Player Notes & QA

"This is a really impressive game. Please let me know when the game is officially out"
-Wanli Tang

"I really liked the LLM dialogue system. The ghost voices were hilarious"
-Jacob Stephens

"My first impression is that the frat guy must be the killer."
-Jayden Lin

"There's no way this was made in two months."
-Marrisa Addis

Game Overview

GENRE:

Co-op Horror Investigation

In 1988, seven USC students were found **dead** inside a *Kappa House* party, and the killer among them was **never** found.

Fourty Years Later, two private investigators return to the abandoned dorm with their **SnakeBoy**, a device capable of **communicating** with the dead.

Tool & Fantastical Twist

Real Life Snake Cameras:
Reveal narrow spaces that are physically
hidden.

Fantastical twist:
DETECT, KAPTURE, and
INTERVIEW spirits that are hidden
from naked eyes

LED changes color based
on captured spirits

Cursor controlled with
IMU like a wii remote

WIFI signal shows
proximity to ghost

HOLD JOYSTICK BUTTON
CONVERSATE

Game Loop

EXPLORE ABANDONED DORM

FIND PARANORMAL ACTIVITY

KAPTURE HIDDEN SPIRITS

INTERVIEW

UNLOCK HIDDEN AREAS

ANALYZE TESTIMONY

VOTE ON KILLER

SnakeBoy™

Targeted Audience

Players who enjoy:

- Horror games
- Paranormal investigations
- Detective Mystery solving
- JRPG
- Co-op games
- Horror Comedy
- 16+

7 Suspects: Who is the killer?

Future Improvements

Issue	Improvement
Basic ghost AI and interactions	Smarter ghost behaviors with player/sound reactions
Minimal hardware feedback	Haptics, hardware interactions, and OLED animations
Low replayability	More endings, suspects, and mystery variations
Limited storytelling	More cutscenes and cinematics
No clue-based ghost interaction	Clue presentation system
Limited facial animation	Blendshape facial animations with emotional expressions exported from VROID
