Fall Recruitment Pitch

Have you ever lost a hard drive?

How did you name your folders?

How many of them are backed up somewhere else?

Does being stored mean they are better remembered?

Memory doesn't function like digital storage.

1 Memory is **embodied**.

The last time your feet dip into seawater...

2 Memory is **constructed**.

How can you fact check a piece of memory?

3 Memory is **fragile**.

Remembering takes active effort.

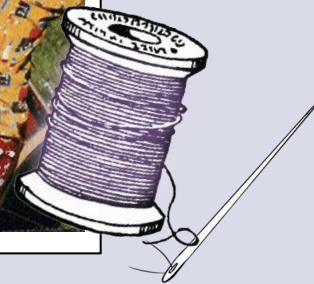

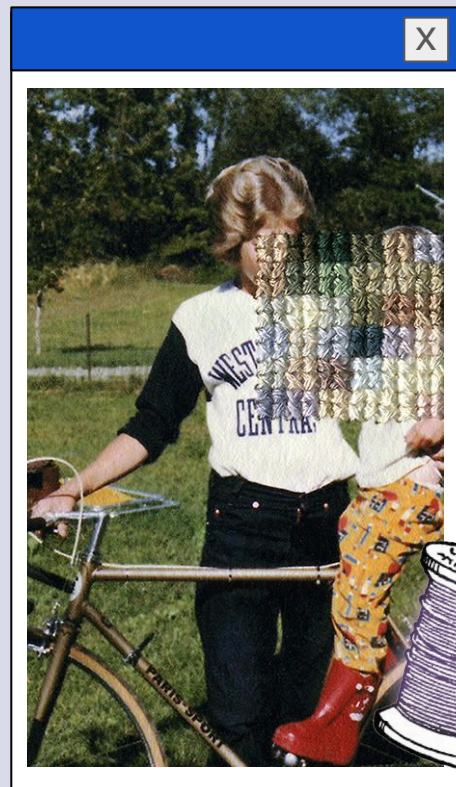

I wonder how to recreate the [feeling of remembering](#).

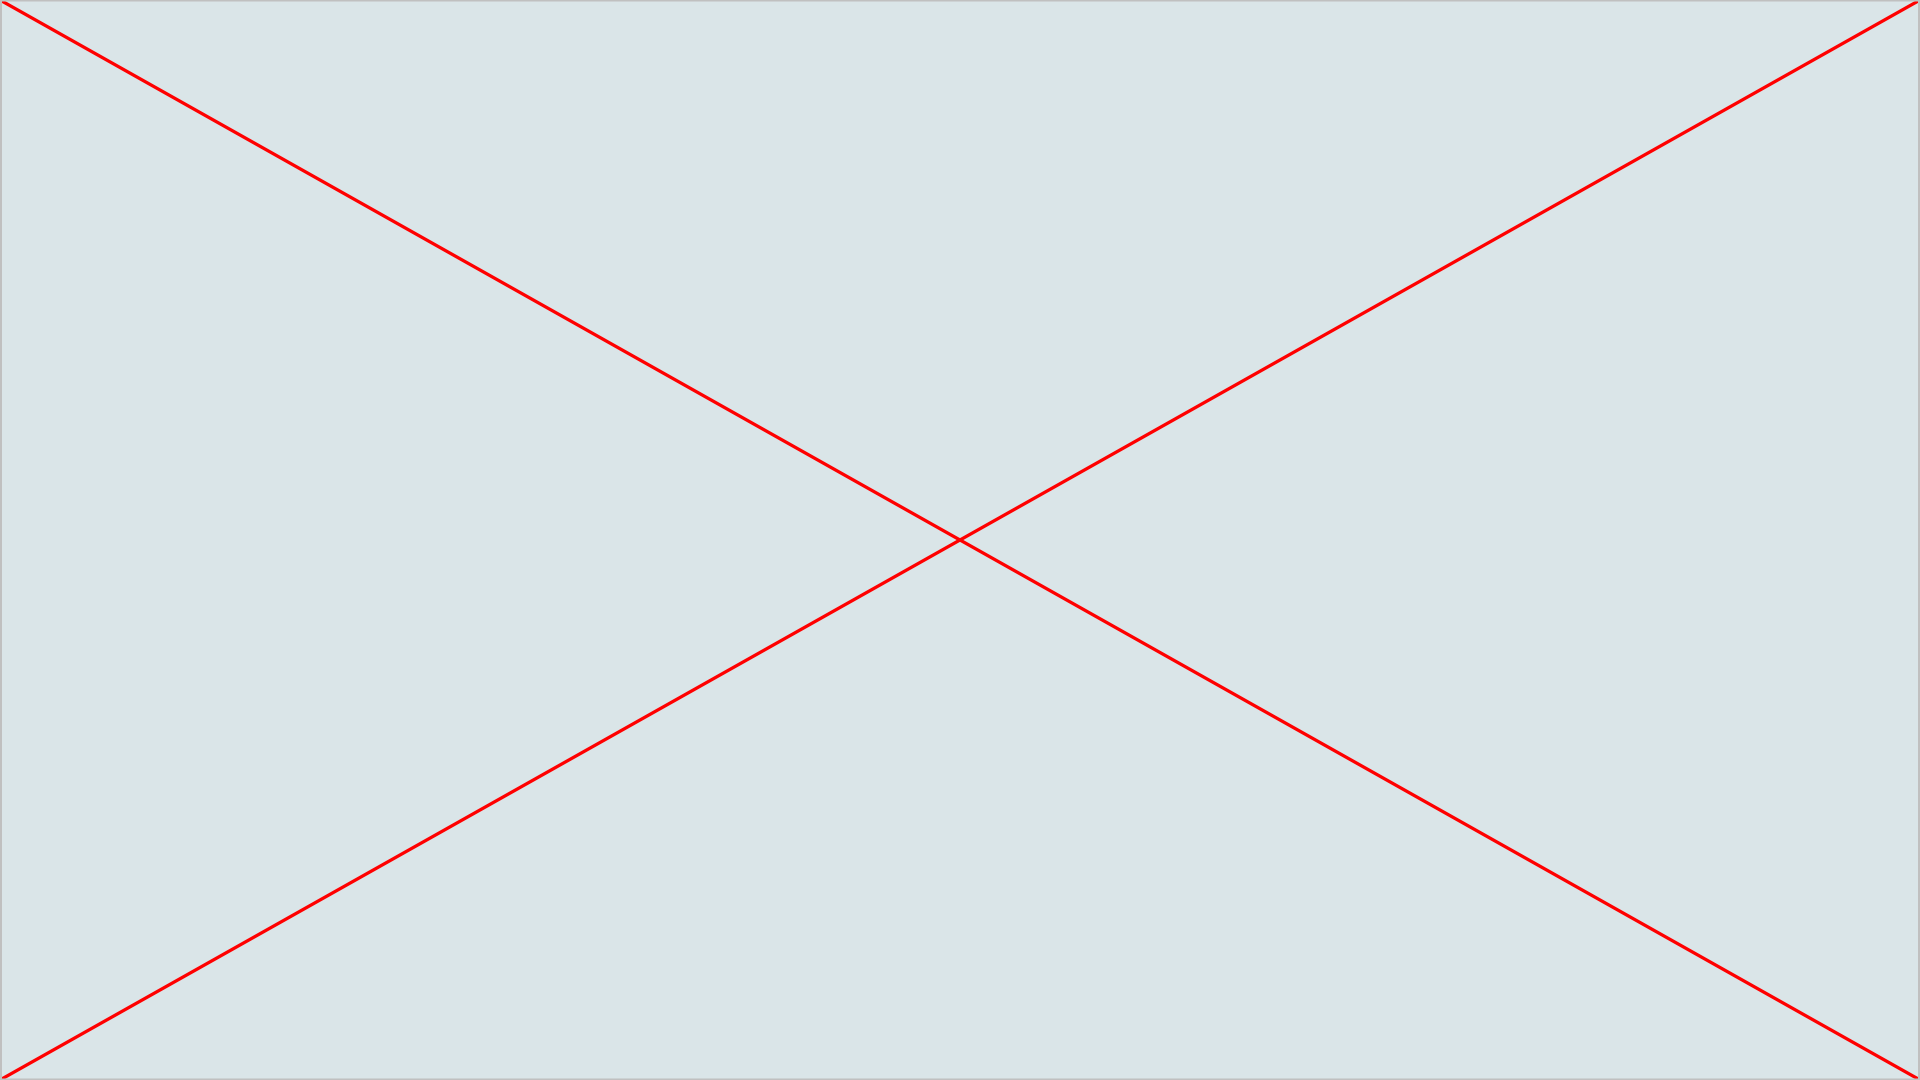

Concept

Resolution is a narrative, alt-controller experience played with a **custom weaving kit**, about a young woman understanding the unresolved loss of her grandpa through memory.

Play as Lina, revisit forgotten folders on her old Windows desktop, and **weave the low-resolution images back into focus.**

Setup

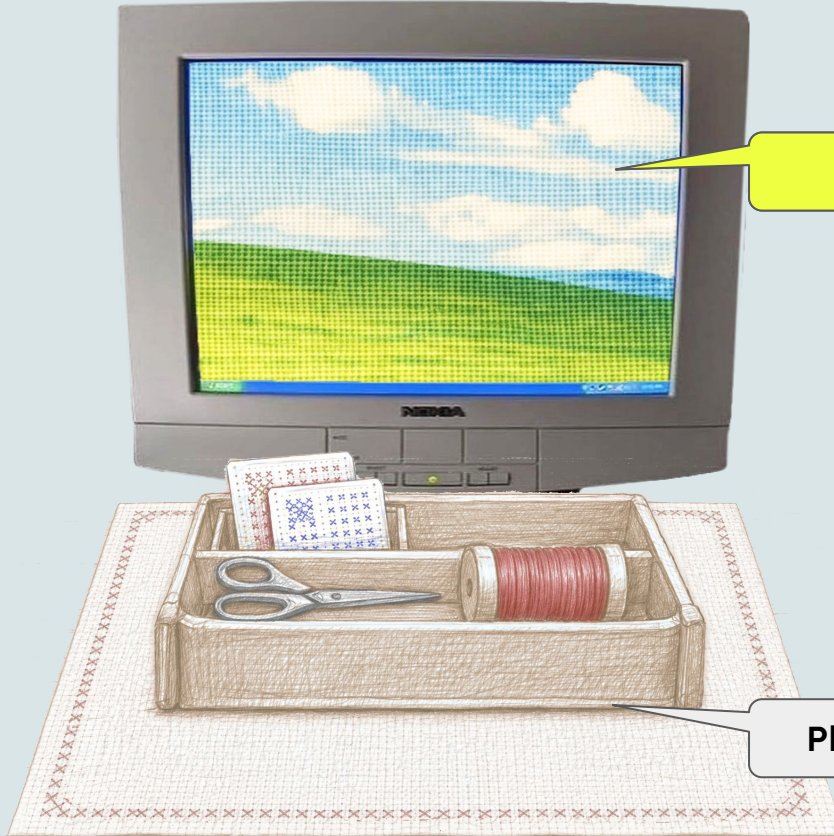

Digital: Game build

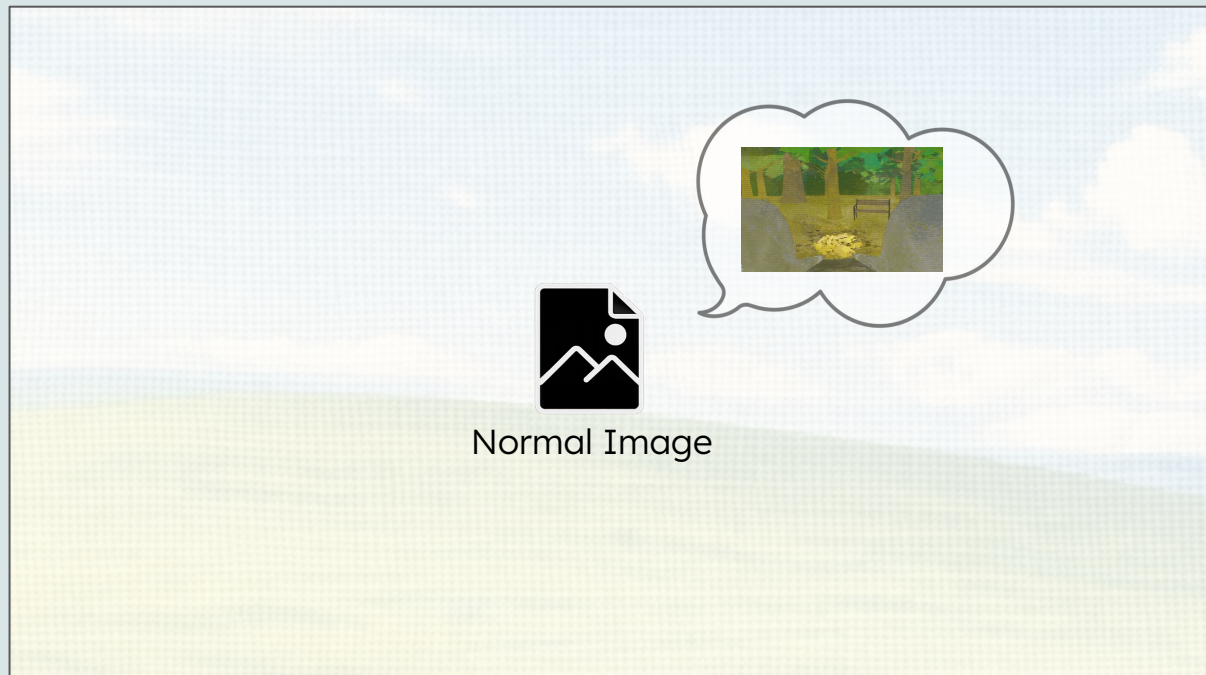

Windows XP aesthetics

Physical: Alt controller

Perform repetitive labor
of weaving **WITHOUT**
actually weaving on cloth

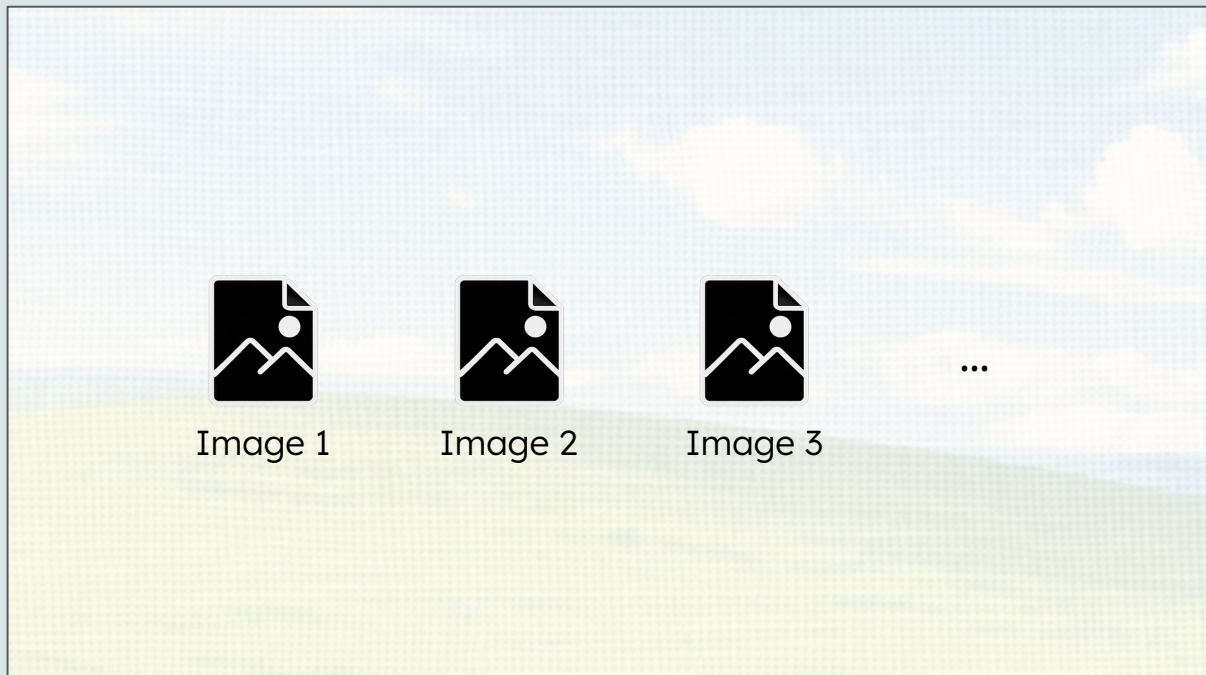

Gameplay

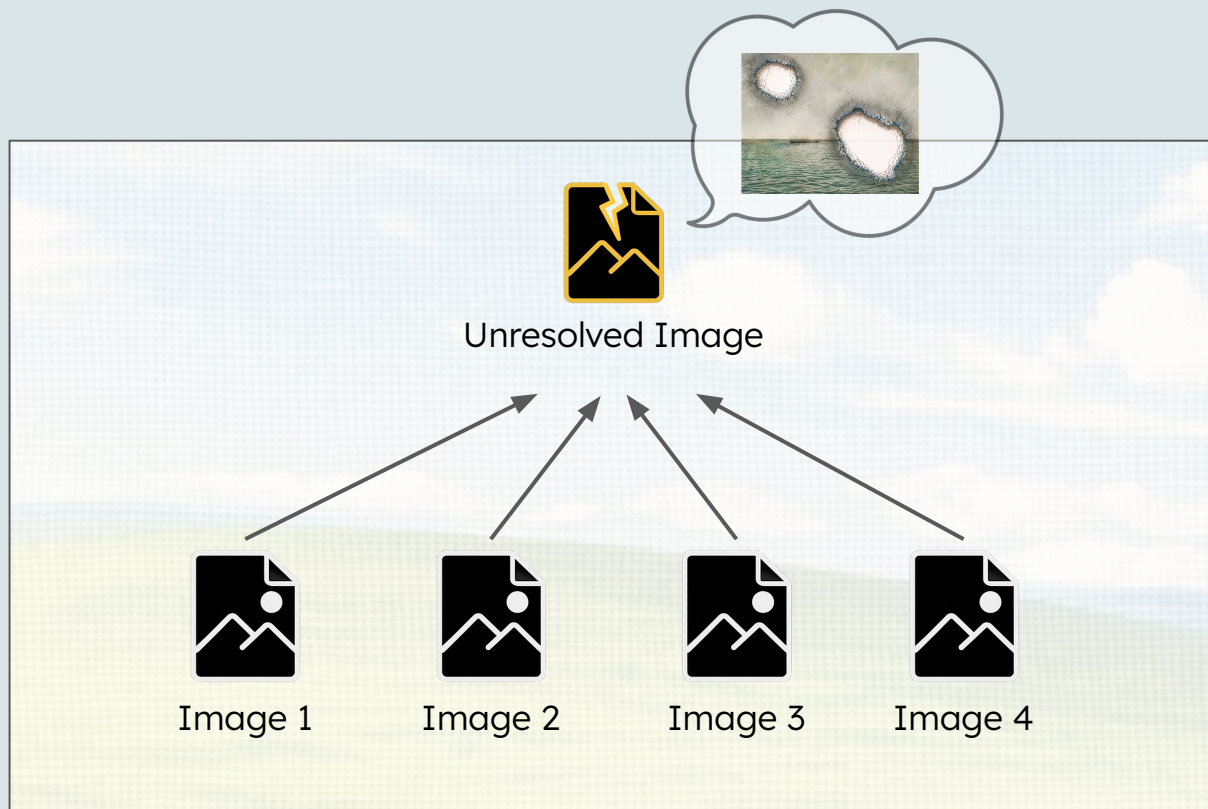

Every image on your Windows desktop acts as **a piece of memory**.

Gameplay

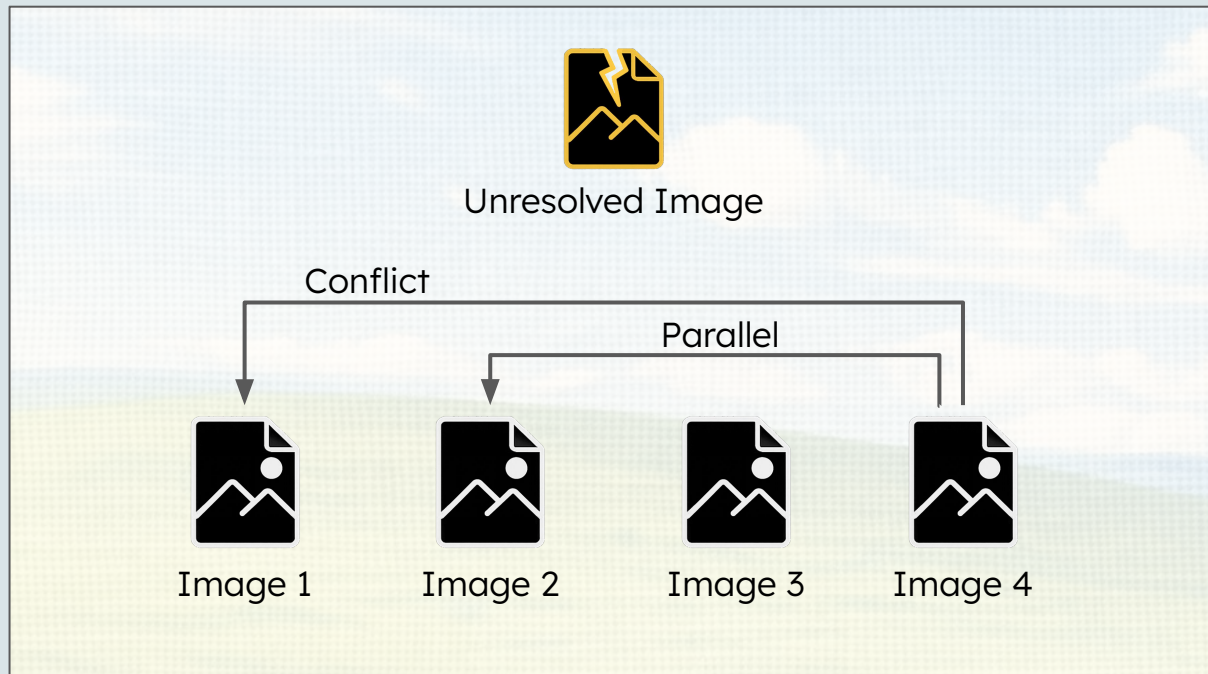

Weaving an image gains resolution, and unlocks more in **non-chronological** order.

Gameplay

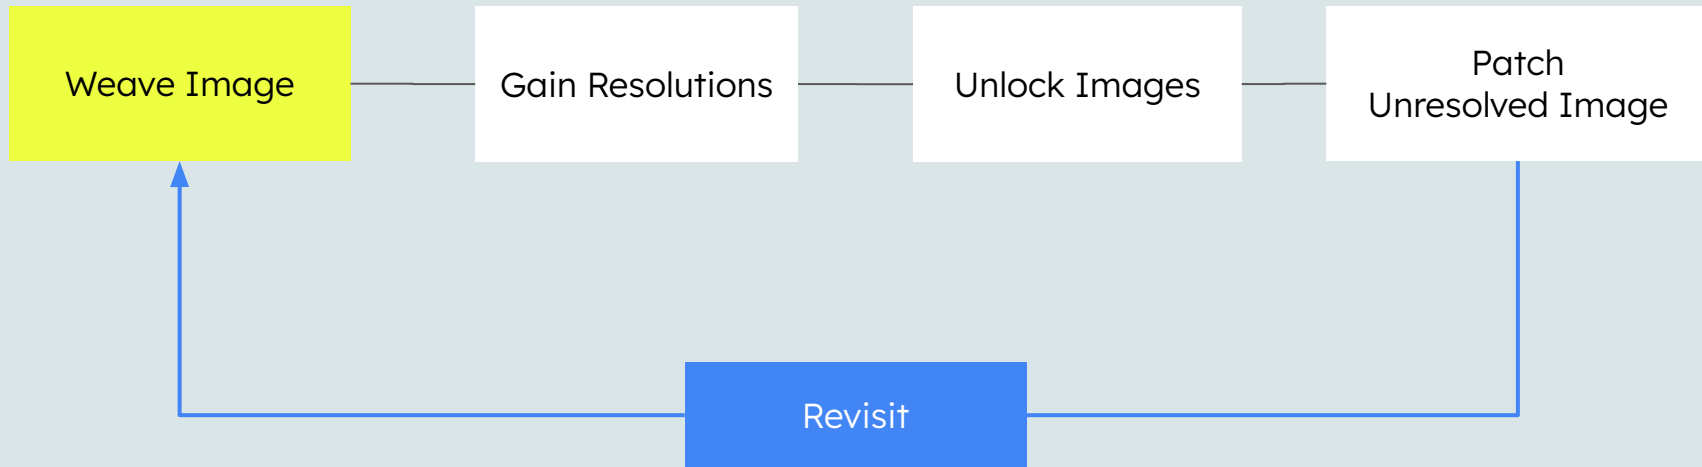

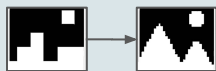

Remembering more allows you to **patch** the unresolved image (the truth).

Gameplay

Also lets you **revisit** an earlier image with new insights.

Gameplay Loop

More understanding of the story

Setup

Digital: Game build

Windows XP aesthetics

Physical: Alt controller

Perform repetitive labor
of weaving **WITHOUT**
actually weaving on cloth

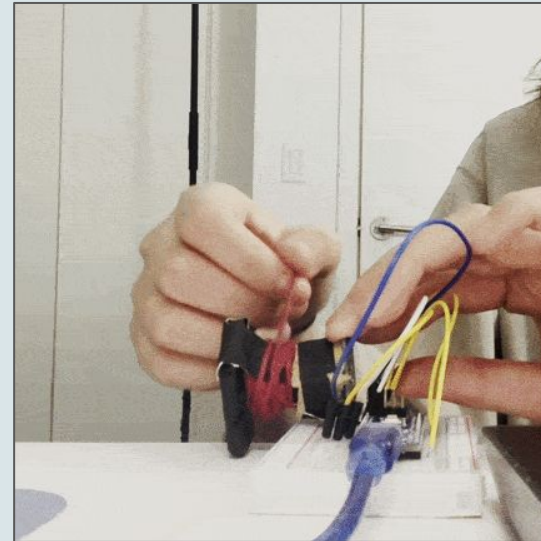

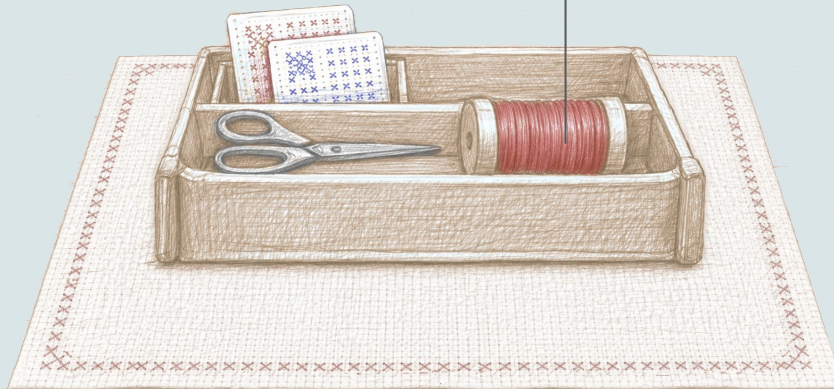

Spool

To Weave

Pull and rewind with even tension, gain resolution of image

Punch cards

To Choose

Pick a weaving pattern

Different cards plays different dialogues of the same memory

prototype

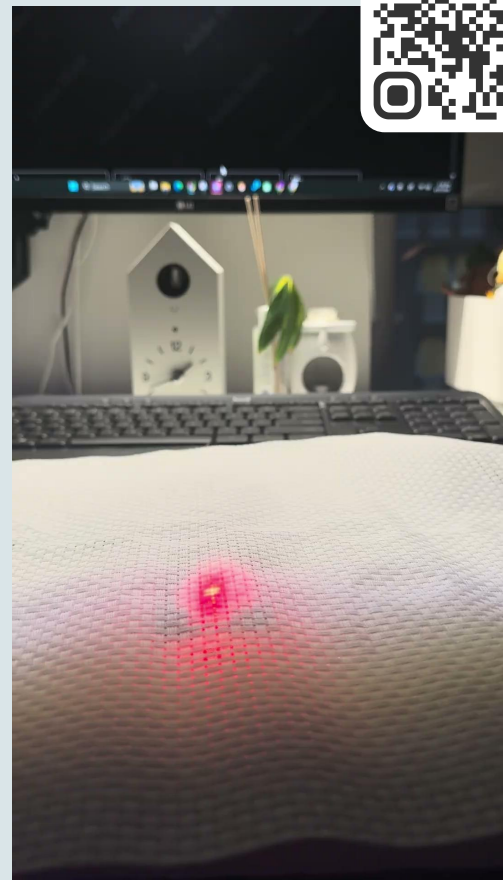

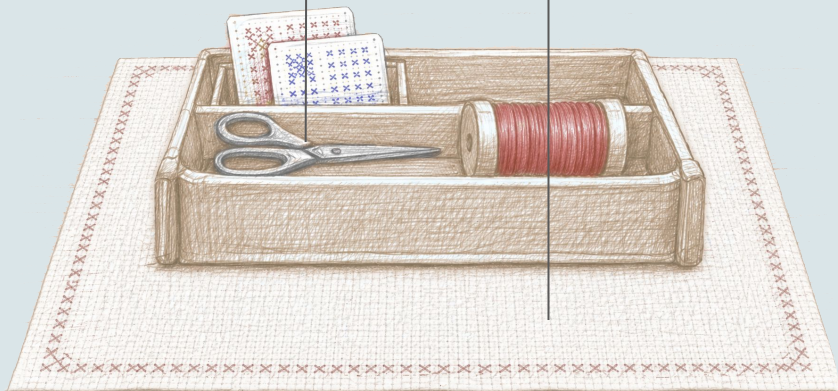

Scissors

To Erase

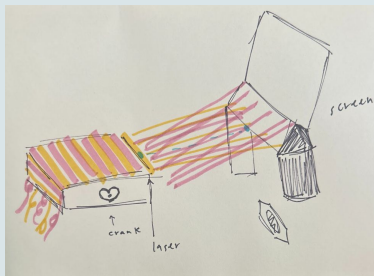

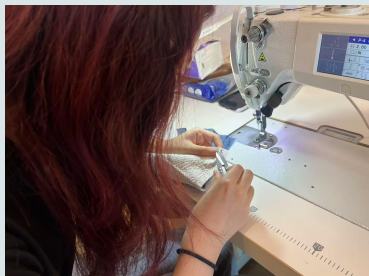

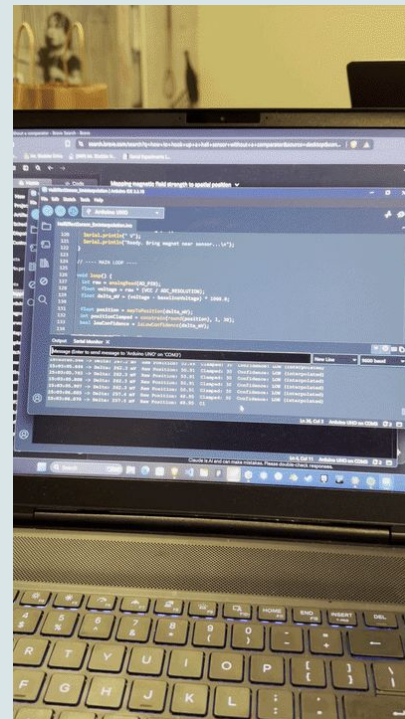

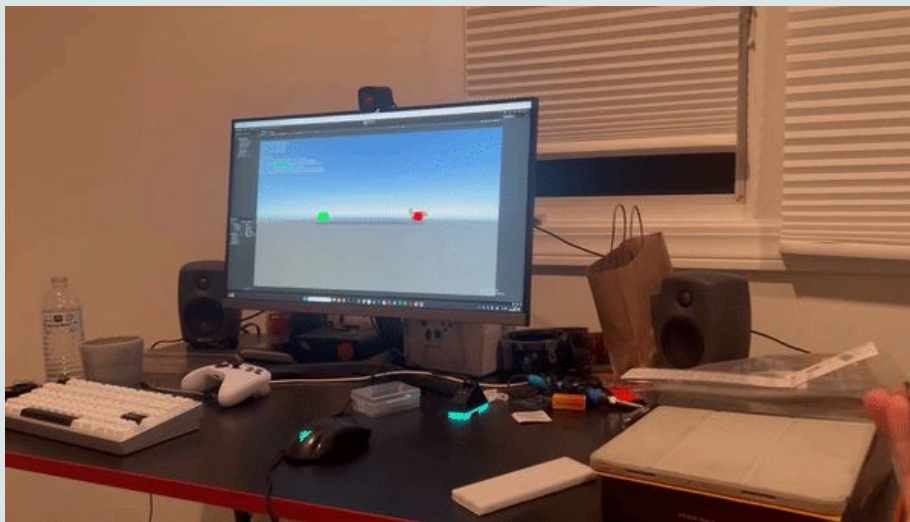

Carefully cut out to reweave a
part of the image

Fabric

To Hover / Click

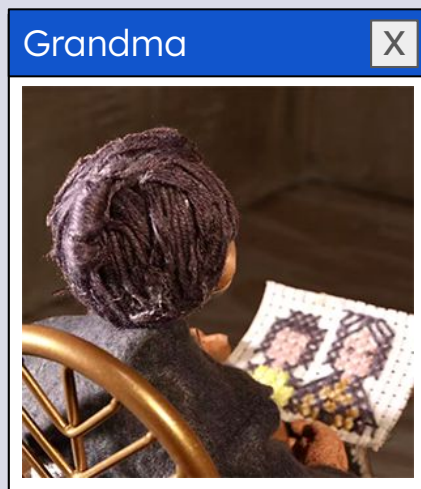

And more explorations

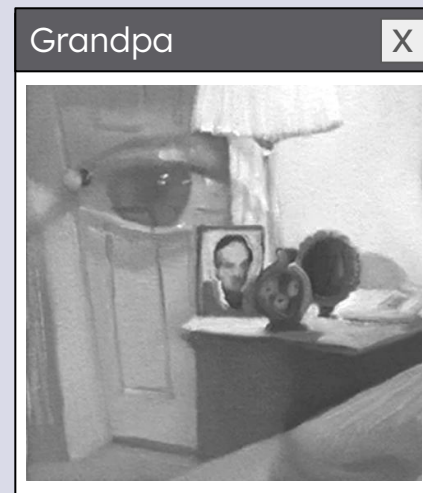

Narrative

Player character & VO
Raised by grandparents

Tight-lipped, abrasive
Teaches Lina how to weave
Expresses care through making

Soft-spoken, affectionate

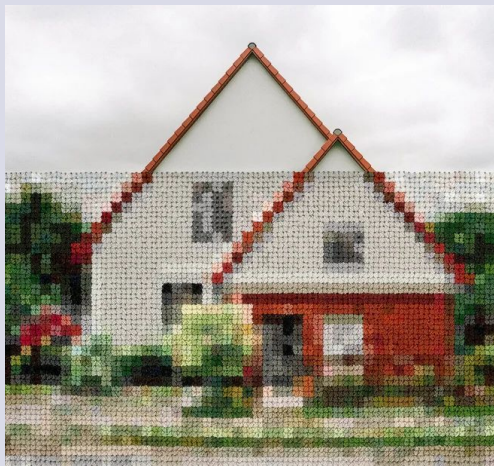

References

Looks like hand-sewn, ethereal fleeting moment

Skála František's photography

Diane Meyer's hand-sewn collage

Shader exploration by Rae

References

Feels like hands busy, mind drifting in a daydream

What remains of Edith Finch

Maps of the Known World: Type to keep the image from blurring

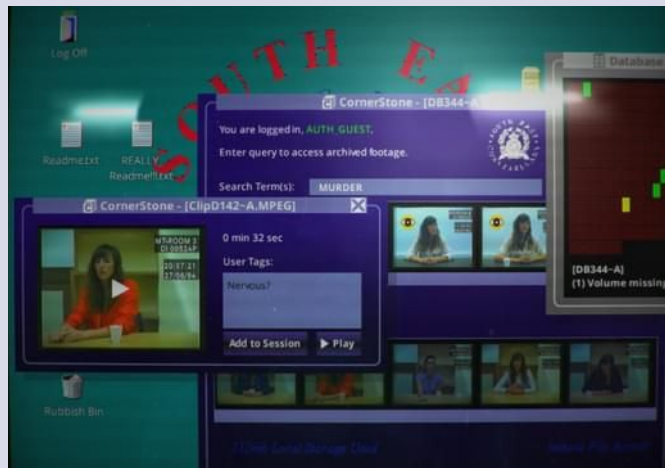

References

Narrative plays like piecing together fragments

To the Moon: reconstructing a life through fragments

Her Story: Non-linear discovery

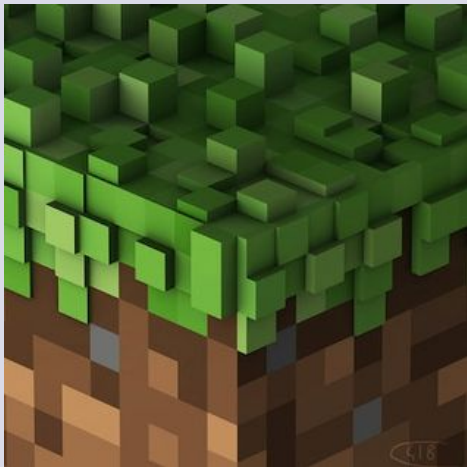

References

Each image has a unique looping track, building resolution in layers

Nostalgic ambience

Heavy use of ambience sounds

Tools

Unity 3D

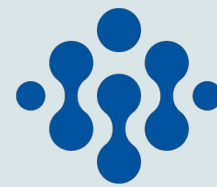

Arduino

Github

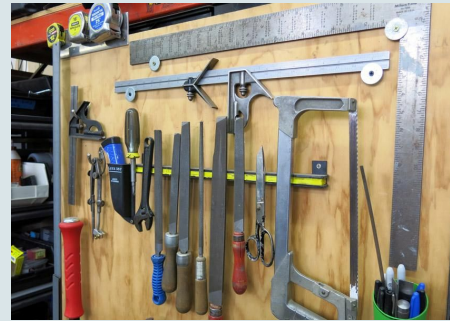

Blender

Wwise

Yarnspinner
(literally)

Fabrication

Lead Producer: Shan

Lead Tech Art: Rae

Assistant Producer (Art)

- Familiar with 3D art & animation pipeline, bonus if interested in marketing

3D generalist (Environment)

- Props, set dressing for memories

3D animator (Cinematics)

- Animating camera in Blender

2D artist (Storyboard)

- Design staging and composition of beats in the animation

2D artist (UI)

- Retro Windows XP + Fabric Remake

Your previous audio lead,
now composer: George

Lead Audio

Audio Designer

Knows at least one of the following:

- Wwise
- Voiceover production

Lead Narrative: Darcy

Lead Design: Wenxuan

Lead Engineer (Unity)

Gameplay/System Engineer (Unity)

- Architecturing the systems of the game
- Familiar with one or more:
 - Save/checkpoint system, state machines, event-driven systems.

Prototype Engineer (Fabrication)

- Familiar with one or more:
 - Arduino hardware prototype
 - Fabrication tools (laser cut, 3D print, mechanical structure)

Engineer:

Lead Engineer (Unity)

Gameplay/System Engineer (Unity)

Prototype Engineer (Fabrication)

Audio:

Lead Audio

Audio Designer

Additional Roles:

Usability

Voiceover director

Voiceover actors

Art:

Assistant Producer (Art)

3D generalist (Environment)

3D animator (Cinematics, Shot design)

2D artist (Storyboard)

2D artist (UI)

Resolution Interest Form

(with role description!)
