

Frame 1

Place slingshot in scanned environment. Players can pinch or use controller to place and/or aim with trajectory via line renderer

Frame 2

Players can also place prefab structures, which will have rigid bodies that can fall on enemies if the slingshot hits them. They will have a catalog panel that will let them choose which objects to place.

Frame 3

Enemies are placed in the environment once the placement of the slingshot is settled.

Frame 4

use trajectory to destroy structures & kill enemies!
Particles SFX & UI to signify death to player

Frame 5

A ranking out of 3 stars is given to the player based on how they did.

Frame 6

Game over animation & the gameplay loop repeats.
